The RFT102/20-50UM is a 50µm filter and is a direct drop in replacement for Trumpf's p/n 1888631. The fiber-to-fiber bond at each contact point featuring integral rigid thermally bonded construction enables consistent filtration and eliminates pore size variability and media migration. This simple but clean and rigid structure utilizing state-of-the-art fiber technology allows for longer service life and higher throughputs.
